Email: naektije@transjakarta.co.id
To: PT Transportasi Jakarta

Dear Sir/Madam,

I am currently teaching a course at the University of California, Berkeley titled ERG 131: Data, Environment and Society from August to December 2019. The course focuses on applying predictive analysis methods to environmental applications. For the course's final project, students are encouraged to explore a prediction question related to energy and environment of their interest. Two of my students, Jash Vora and Jesica Sutandi, are working on predicting the expansion of public transit in Jakarta, using the number of public transportation passengers. Thus, I am writing to request historical data of the number of passengers or the hourly/daily number of rides for the last two years on behalf of my students. The data would benefit their project and subsequent findings, and will not be circulated.

For future correspondence, please contact jesica.sutandi@berkeley.edu. Thank you for your time.

Sincerely,

A handwritten signature in black ink, appearing to read "D. S.", with a stylized flourish at the end.
